PIC1008WN

TRUE PLUG & PLAY Wireless-N Outdoor IP Camera

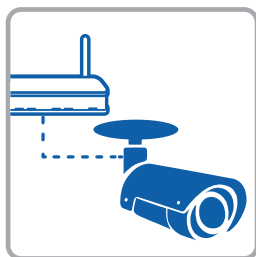

The **PROLINK® PIC1008WN True Plug & Play Wireless-N Outdoor IP Camera** is designed to work well with both home and commercial environments. While the new PIC1008WN shares all core characteristics of its hugely successful predecessor PIC1006WN-HD, the PIC1008WN offers an IP66 rated enclosure which provides a full protection against dust particles and powerful water jets.

The camera also supports High-Definition Megapixel recording and Dual-lens automatic day/ night switching. This is great for monitoring in retail establishments such as warehouses or convenience stores.

Better yet, the PIC1008WN uses Power over Ethernet technology which allows electrical power to pass through the Ethernet cable and this enables the camera to be mounted anywhere especially when no electrical wall socket is available nearby.

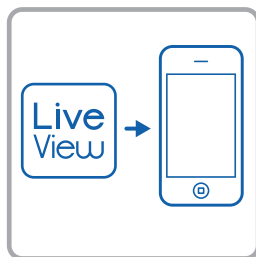

Also, the PIC1008WN comes with motion and sound detection that helps to minimize false detections under different circumstances. Once the IP camera set-up is completed, you can access the PIC1008WN remotely via computer, tablet and/or smartphone for live video monitoring.

As Easy As 1-2-3 Setup

1. Connect To Router

Connect the camera to the router through wired or use one touch WiFi security setup (WPS) for wireless connection

2. Download Apps To Mobile/Tablet

Mobile Access (Android & iOS):
Install the free application mLiveView/mLiveViewHD on your smartphones/ tablets

PC Viewing (Windows):
Install LiveView software from CD (provided in the Setup CD)

Web Access (Internet Explorer):
Open <http://www.fida.com/online.html>

3. Scan QR Code To Add Camera

Scan the QR code to add camera.

Specifications

Processor	RISC CPU, hardware video processing and compression
Interfaces	RJ-45 Ethernet 10/100Mbps, Auto-Negotiation (MDIX) Wireless IEEE 802.11 b/g/n with WPS button
Max. Connection	Up to 36 cameras and 20 unicast users simultaneously
Recording	Built-in Micro-SD slot (up to 64GB); Direct recording to NAS Storage, Dropbox, PC or Mobile
Image Sensor	RGB MegaPixel 1/4 inch CMOS; Day and Night separate sensors; Automatic Exposure/ White Balance/ Gain/ Brightness control
Light Sensitivity	0.2 Lux (IR LED off); 0 Lux (with 10 meters IR LED on); Automatically turn on the IR LED in low light environment
Power	Power over Ethernet
IR LED	1 to 3 high power IR LED, software adjustable
Housing	Weather-proof IP66 rated
Lens	3.3mm; F2.8; Viewing angle: 70°; Fixed iris; Focus range: 30cm to infinity; Two separate lens, one for Day and one for Night
Buttons	Factory default reset; WiFi security setup (WPS)
Indicators	LED indication for Internet connection, Ethernet connection and SD card recording
Video	H.264 (MPEG-4 AVC) compression; Max. Resolution WXGA 1280 x 800 at 30fps
Audio	Built-in microphone for audio monitoring; Audio compression G.711
Alert And Monitoring Mechanisms	Motion and Sound detection; Notification via Email/FTP; Push notification on IOS and Android devices
Physical Specifications	Dimensions - 52 x 58 x 230mm (HxWxD); Weight - 350g (camera body only)
Package Contents	PIC1008WN Camera; Power adapter; Ethernet cable; Ethernet Coupler; PoE Splitter; Quick Installation Guide; Setup CD; ID/Password card; Anchors & Screws

HD

High Definition MegaPixel

High definition 720p with 1280 x 800 resolution at 30fps. Supports the latest H.264 technology in video compression.

Dual Lens & Sensors for Day and Night Operation

PIC1008WN automatically selects the Day/ Night-time lens depending on the illumination level. No IR Cut Filter required; reduces the risk of mechanical failure.

Push Notification Alert

Any alert triggered by the Motion or Sound sensor will be delivered instantly to your mobile devices as a form of a push notification.

One Touch WiFi Security Setup (WPS)

Instantly establish a secure wireless connection between the camera and router by simply pressing the WPS button on both devices.

Multiple Recording Methods

Record directly to Dropbox cloud storage, MicroSD card, NAS storage, PC or your mobile device.

Live Viewing and Video Management Software

Free Android/ iOS mobile apps and professional 36 channels Video Management Software for live monitoring and archiving.

Robust IP66 rated enclosure

The PIC1008WN offers an IP66 rated enclosure which provides a full protection against dust particles and powerful water jets.

POE

Power over Ethernet (Passive PoE)

PIC1008WN uses Power over Ethernet which passes electrical power along with data over the Ethernet cable. This methods enables the camera to be mounted anywhere especially when no electrical wall socket is available nearby. (Requires the use of the supplied power adapter and PoE splitter)
